PROFILE

I am a highly motivated and adaptable Computer Science student with a strong willingness to learn and a passion for solving problems through technology.

I embrace diverse perspectives, quickly understand new systems, and thrive in team-oriented environments.

I am driven by curiosity and practical efficiency, always seeking to innovate and improve.

Three Words That Define Me:

Curious , Efficient , Collaborative

PROJECTS & EXPERIENCE

Web Development

2023 - 2025

- Built various websites for learning and personal use, focusing on design, responsiveness, and user experience.

AI Projects

2025

- Currently exploring and building open-source AI models.

Data Analysis (In Progress)

2025

- Applying real-world data projects through ongoing training on Kaggle.

Graphic Design

2025

- Designed posters for events and digital promotions using Canva and other tools.
